

Once home, a pharmacist will call you to answer any questions, problems, or concerns you might have.

WEEKLY VISIT

A nurse will schedule a time to have your weekly IV dressing changed, labs drawn (if ordered) and assess for any other needs.

WEEKLY MEDICATION

A Clinical Coordinator will call to evaluate your individual needs once a week. A pharmacist will prepare your weekly medication and supplies to be delivered to your home. They will ask:

- » What supplies do you have?
 - » How does your site look?
 - » Are you having any drainage, redness, etc.?
 - » Are you having other problems (fever and/or pain)?
 - » Do you have any new medications?
-

ENTERAL PATIENTS

Our Dietitian will call to evaluate your individual situation. They will ask:

- » How are your feedings going?
- » How much formula are you taking daily?
- » Do you have any nausea, vomiting, constipation or are you running a fever?
